Project Aims & Learning Outcomes

The main aim of this project is to meet the needs of disadvantaged schools and children in Nepal. These schools have limited funding and lack many learning materials and facilities. This makes it more difficult for teachers to run effective classes and for children to get the stimulation they need. You'll help children learn through play, improve their language skills and develop healthy routines. You'll also get to make a visible impact through renovation work!

Student Learning Outcomes

Intercultural Competence

Students will be immersed in different cultures, gaining an understanding of their role within our global community and developing a deeper cultural awareness.

Leadership Development

Students will be pushed out of their comfort zones, experiencing new challenges each day. They will build their confidence and resilience through team activities and new life experiences.

Healthy Active Living

Students will be encouraged to prioritise their self-care, enhancing their physical and mental well-being.

Empowerment

Students will be empowered to think for themselves, challenging the "status-quo" and cultivating transformative decision-making mindsets.

Global Citizenship

Students will be exposed to new perspectives, engage with real-world challenges and contribute to sustainable development initiatives.
